1. Cloud computing fundamentals

M. Sai Abhilash
192126021

2. Evolution of cloud computing

3) Cloud service models

Iaas:-

Infrastructure layer
provider manages
network
user manages:
OS, applications,
data.

Paas:-

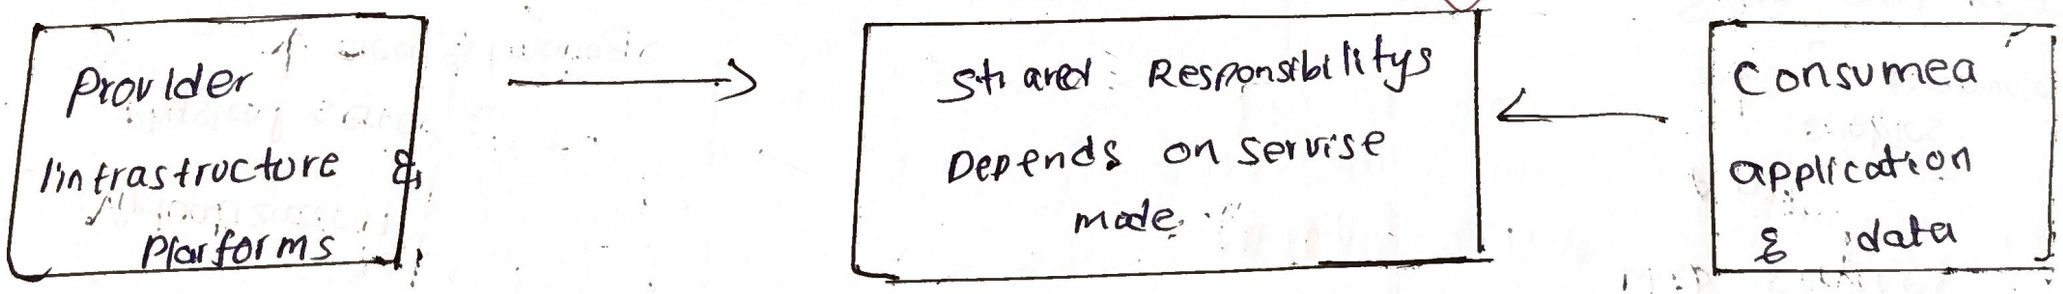

Platform layer,
provides manages
* Infrastructure, OS
user manges
* Applications
data

Saas:-

Applications byer
* Application &
underlying
infrastructure
user software &
manages content
settings

Xaas

Anything as a
service
* Variety (IT services
storage, software etc)
* Service usage
and
configuration

Virtualization and Web services as Enablers of cloud

Virtualization t web services

Virtualization

Physical server
↓ creates/manage
Hypervisor
↓ creates
Virtual machine
↓ abstracts
Abstraction and efficient resource use

Web services

API
↓ enables communications
Soap and REST
↓
Applications to-service communications

↓

cloud deployment & scalability

13/10/20

Deploy applications & resources

Increases/decrease resources as demand changes

Provider suppries service

Consumer accesses service.
